MEMORANDUM FOR: All Personnel Georgia Wing

FROM: Commander Georgia Wing Civil Air Patrol

SUBJECT: Airborne Photography Training and Mission Sign Off on Counter Drug Missions

1. It has come to my attention that some officers are using Counter Drug Missions, on which no photography was requested by the customer or au to sign off the sortie participation requirement for the Airborne Photographer qualification, after careful review and consultation with other officers I have determined that this practice is not fully in compliance with CAP/USAF directives and 1st AF instructions.
2. Officers participating in Counter Drug missions (A3 mission designation) where no customer photography was requested and approved will not use these missions as opportunities to sign off Airborne Photographer tasks. This in no way prohibits training in other mission aircrew qualifications. Airborne Photographer task sign off can however be accomplished during Counter Drug Training missions (A4 mission designation) when in compliance with the approved Operations Training Plan.

Tonya R. Boylan, Col, CAP
Commander
